

# Benches & Material Handling

# Rolling & Stationary Bench Systems

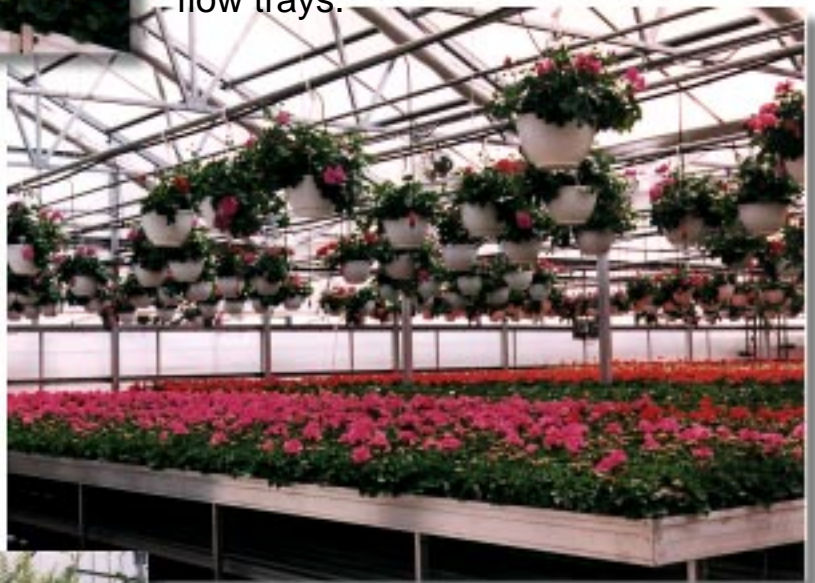

ment for bench level. The benches feature anti-tip brackets that keep the bench tops in place if there is an un-equal load.

Two sizes of aluminum side rails are available, a low edge for easy lift-overs and a high edge designed to accept most ebb and flow trays.

## United's Rolling and Stationary Benches

United's rolling and stationary benches feature a roll-formed open leg design that prevents water build-up and associated corrosion. Each bench leg has an individual adjuster that allows for the precise adjust-

All benches feature aluminum corners to pop-rivet for a finished corner. A choice of covering materials, widths and lengths to suit your specific requirements is always available.

United / Otte  
Container Benches &  
Material Handling  
Equipment

United has teamed with Otte,  
Germany's leading producer of  
container benches and

material handling equipment to  
bring the Otte name to the United  
States. United and Otte will work  
together to bring the latest in labor  
saving container transportation and  
material handling to your facility.
